

General Manager

Retail Lumber Building Materials

Timmins, Ontario

Excellent base salary, vehicle, benefits, RRSP matching, phone + equity potential after 5 years

Bilingual is preferred but not essential.

Relocation available

Our client is an established retail business in Timmins, Ontario with outstanding location and many years of loyal customers. Servicing the building materials industry, this state of the art facility has both a retail store and lumber yard and all the infrastructure in place to be the dominant building materials supplier in the region.

We are currently seeking a talented individual with the potential to drive this business to greater levels. We are looking for a people leader with a passion for sales and customer service that wants to be included in ownership decisions and, over time, become part of the business as an equity share is the end goal for the individual. The facility has the potential to be a \$20m + business but is currently under performing due to its underperforming retail arm. As such, we really need someone with a passion for retail. They should have strong merchandising skills, the ability to capture, analyze and utilize data, the vision of what makes exceptional retail customer experience, and the marketing skills to drive footfall and increase sales.

We seek a bright and talented individual who wants to make this business their career and commit to the success of the business on a long term basis. Working closely with the owner, the successful candidate will become part of the business and may also get involved in other areas of this multi-dimensional growing organization. Either way, equity is definitely on the table for the right person and this could be your opportunity to move into ownership of a multi-million dollar business.

Applications in writing please. Thank you for your interest.
